

Reduce your  
“Tire Footprint”™

*AlternArena™ is a dust free,  
low maintenance alternative to  
traditional arena surfaces.*

***Spend your time enjoying your  
arena, not maintaining it!***

*AlternArena™ is your ticket to savings ...*

*AlternArena* is an alternative surface that won't turn to dust, isn't slippery when wet and doesn't freeze. The fact that it's made from rubber means it acts as a cushion and doesn't compact or degrade with use or time. This can help reduce leg strain and injuries. Less routine maintenance and longer life cycle will save time, money and fuel. As a bonus, you're preventing tires from being dumped into landfills or piles where they become mosquito breeding fire hazards. Yes, that's right, *AlternArena* is recycled from used tires with a high tech, clean and green cryogenic process. Freezing the tires is the key to making it steel free. Reduce your “tire footprint” on the environment while providing superior footing in your arena. *AlternArena* doesn't absorb water that may support mold, mildew, weeds or pests. *AlternArena* is safe for people, animals and the environment. It provides excellent drainage and will not float away in heavy rain or leach colors. *AlternArena* has a five year warranty.\* Contact us TODAY to get your *AlternArena* on the way.
