

Reduce your
Tire Footprint™

Extend the benefits of your
yard work and keep your
property beautiful season
after season with
AlternaMulch™.

*Call us for details.

*Spend your time enjoying your
yard, not maintaining it!*

AlternaMulch™ is your ticket to less yard work...

AlternaMulch is the easy alternative choice to extend the beauty of your landscape, season after season. Next spring, the melting snow will reveal your vibrant AlternaMulch instead of dull, dingy and decayed remnants of wood mulch. Imagine having fresh looking mulch all year long. As a bonus, you're preventing tires from being dumped into landfills or piles where they become mosquito breeding fire hazards. Yes, that's right, *AlternaMulch* is recycled from used tires with a high tech, clean and green cryogenic process. Freezing the tires is the key to making the rubber steel free. Use AlternaMulch as an alternative anywhere that you put wood mulch last year. Use the same methods and tools, just don't do it as often. It doesn't absorb water that may support mold, mildew, weeds and attract pests. Instead, AlternaMulch lets rain and fertilizers pass through to soak into the soil where they can nurture your plants. AlternaMulch is safe for people and the environment. It will not leach colors or float away in heavy rain. AlternaMulch has a five year warranty.* Contact us TODAY to get your AlternaMulch on the way.

AlternaMulch™ is available in several vibrant colors

Forest Green

Royalty Purple

Radiant Red

Ecogineering™: ecologically friendly... yet economically viable.
